made to make painting easy

SYNTHETIC FINISH

Robbialac Synthetic Finish is the very latest material for all inside and outside painting. It has greater durability than cellulose and all the advantages of elasticity, ease of working, exceptional cover and richness of gloss. It dries dust-free in 3-4 hours, yet flows on without the sign of a brushmark. The gloss goes right through, which means that the surface will stand up to no end of hard wear, washing and weather, and retain its natural lustre longer than any other type of paint.

Sold in small tins and ⅛ pt., ¼ pt., ½ pt., 1 pt. and 1 qt. sizes.

1 PINT COVERS APPROXIMATELY 100 SQ. FT.

HARD GLOSS PAINT

The free-flowing character of Robbialac Hard Gloss Paint allows a perfect brush stroke, to produce a surface free from brushmarks, laps and sags. It obliterates better than most gloss paints and a little goes a long way. It is durable and yields good service outside or in.

The surface it imparts is steam-resisting, which accounts for its popularity for painting the woodwork and walls of bathrooms, kitchens and sculleries.

In ¼ pt., ½ pt., 1 pt. and 1 qt. tins.

1 PINT COVERS 90-118 SQ. FT.

READY-MIXED PAINT

Some people prefer paint that dries with a semi-matt finish, for doors, windows, porches, ironwork and other surfaces. If you want to make a success of work of this kind—cheaply as well as quickly—use Robbialac Ready-Mixed Paint—you can apply it on wood, iron, plaster concrete, stone, stucco or brick.

Supplied in four sizes.

9d. TIN COVERS 24-27 SQ. FT.

You can paint it with ROBBIALAC SYNTHETIC FINISH

FROM 6D PER TIN

For many years, Paint was the natural symbol of freshness—the magic cloak that clothed drabness with brightness. But here is something *fresher* than paint, something new — ROBBIALAC SYNTHETIC FINISH.

Robbialac Synthetic Finish represents the most recent triumph of the paint manufacturer ; it is neither a paint nor a cellulose, but a new type of material that contains ESINTH, the mysterious ingredient which gives it properties that no other paint or " so-called " Chinese lacquer ever possessed.

- NEEDS NO SKILL
- COVERS IN ONE COAT
- SETS IN FOUR HOURS
- GIVES A GLASS-LIKE GLOSS
- WEATHER-PROOF & WEAR PROOF
- GOES OVER ANY SURFACE

Buy a small tin and apply it on a piece of old furniture whose surface is dull and worn—a mirror, chair or towel horse will do. You will be surprised at the way the liquid spreads evenly and easily under the brush, and how it covers in one coat and levels off to a smooth, glass-like surface.

HAVE A LOOK ROUND YOUR HOME

Have a look round your home ; it's surprising the number of things you'll find to paint. Each of these jobs will take only a short while of your time and make a wonderful difference to the cheerfulness of your home.

Add extra charm to the things you paint by picking them out in a second colour. A black chair looks delightful with red stays ; touches of vivid blue on an old iron bedstead finished in Jubilee Blue, make an admirable effect ; bookshelves look well if handled in vivid shades.

Here are a few more suggestions for pleasing harmonies and delightful contrasts: Marina Green and Jade, Maroon and Signal Red, Chocolate and Biscuit, Biscuit and Marigold, Apple Green and Bright Green, Bright Yellow and Blue, Chocolate and Signal Red, Margaret Rose Pink and Signal Red, Ivory and Blue, Grey and Signal Red, Grey and Bright Green.

THE PRICES MEET EVERY POCKET

and every kind of painting need. Black, ivory white and colours
